OBJECTIVE

Computer Science and Engineering graduate from Rajshahi University of Engineering and Technology (RUET) with hands-on experience in full-stack web development and AI training and evaluation. Skilled in building web applications with Laravel, Flask, and the Node.js–React stack, collaborating in software development teams, and evaluating and ranking Bengali-language AI output, with a strong interest in software engineering and AI-focused roles.

EDUCATION

Rajshahi University of Engineering and Technology B.Sc. in Computer Science and Engineering <i>CGPA: 3.61 / 4.00</i>	Rajshahi, Bangladesh Graduated: 11 August 2026
Chattagram Cantonment Public College Higher Secondary School Certificate <i>GPA: 5.00 / 5.00</i>	Chittagong, Bangladesh 2018–2020

EXPERIENCE

Bdtask Trainee Industrial Attachment <i>Hybrid</i> Certificate	Dhaka, Bangladesh March 2025
--	---------------------------------

- Built BongoSeek, an AI-powered chatbot web application, in one week with a team of 7, after the company director challenged the group to produce a DeepSeek-style assistant.
- Developed the application's backend, implementing logic and API integration, and supported front-end refinements.
- Followed the company's development process end to end, collaborating through Git-based version control.

BracIT Trainee Industrial Attachment <i>On-Site</i> Certificate	Dhaka, Bangladesh March 2025
---	---------------------------------

- Worked through the Software Development Life Cycle (SDLC) stage by stage with the team responsible for each, following their workflows first-hand and completing the tasks set by some of them.
- Analyzed a Business Requirement Document (BRD) assigned by the technical lead, mapping client requirements onto the software solution to be built from them.

Outlier AI Trainer	Remote 2024–Present
------------------------------	------------------------

- Contributed to multiple AI training projects focused on Bengali-language model performance and response quality.
- Evaluated and ranked AI-generated responses for relevance, accuracy, and clarity, and reviewed Bengali-language outputs for grammar, fluency, and factual accuracy.
- Wrote and refined prompts for AI training tasks and assessed model responses against project-specific guidelines.

PROJECTS

BongoSeek | *Flask, React, MySQL* | [GitHub](#)

An AI chatbot that runs DeepSeek's 1.5B model to generate responses.

- Integrated the DeepSeek 1.5B model via Hugging Face to generate chat responses locally.
- Implemented authentication and user sessions using JWT.
- Implemented two-factor authentication and live email.
- Used Flask for backend API endpoints and React for a responsive chat interface.

Boi Lagbe? | *Laravel, Blade, Tailwind CSS, MySQL* | [GitHub](#)

A full-stack book sharing platform for borrowing and buying books with deadline enforcement.

- Built a full-featured Laravel application enabling users to list, borrow, and buy books with approval workflows.
- Implemented search and filtering by book title, author, and category.
- Designed a borrowing deadline system with automatic reminders and user flagging for overdue returns.
- Developed user dashboards and profile management features for requests, approvals, transaction history, status tracking, image uploads, and contact sharing.

Memories | *Node.js, Express, React, Redux, MongoDB* | [GitHub](#)

A simple interactive social media website.

- Built full-stack CRUD functionality for posts including image uploads.
- Developed a RESTful API to handle post creation, update, deletion, and “like” operations.
- Used Redux for state management and Material-UI for a responsive interface.
- Used Express & MongoDB for server-side logic and database management.

RESEARCH EXPERIENCE

Undergraduate Thesis | [GitHub](#)

Evaluating Automatic Metrics and LLM-as-Judge for Clinical Text Summarization

- Evaluated ROUGE, BLEU, BERTScore, and LLM-as-a-Judge for clinical text summarization using 300 MIMIC-IV cases and 900 generated summaries.
- Used Qwen2.5-7B/14B, BART-Large-CNN, prompting, correlation analysis, case-clustered bootstrap, and sensitivity analysis for metric evaluation.
- Found BERTScore to show the strongest and most stable agreement with LLM-based judgments, while the LLM judge aligned more strongly with human ratings than the tested automatic metrics.

SKILLS

- **Backend & Databases:** PHP, Python, Node.js, Express, Laravel, Flask, RESTful APIs, MySQL, MongoDB
- **Frontend:** React, Redux, HTML, CSS, Tailwind CSS, Blade, Material-UI
- **Design & Interface:** Figma, Webflow, responsive web design
- **AI & LLM:** Hugging Face model integration (DeepSeek 1.5B), prompt writing, response ranking, Bengali-language evaluation
- **Evaluation & Analysis:** ROUGE, BLEU, BERTScore, LLM-as-a-Judge, correlation and bootstrap analysis
- **Tools & Technologies:** Git, GitHub, JWT and two-factor authentication, Kaggle

AWARDS & CERTIFICATIONS

EDGE Certificate for PHP (Laravel)	2025
Issued by Bangladesh Computer Council Certificate	Dhaka, Bangladesh
Technical Scholarship	2023–2026
Issued by Rajshahi University of Engineering and Technology	Rajshahi, Bangladesh

EXTRACURRICULAR ACTIVITIES

Photographic Society of RUET (PSR)	2022–2026
Member	Rajshahi, Bangladesh
Islamic Society of RUET (ISR)	2025–2026
Member	Rajshahi, Bangladesh
Bridgestone of Campusian	2024–Present
Member	Rajshahi, Bangladesh
